Revision: 1

## SAFETY DATA SHEET Champion Bore Oil

SECTION 1: Identification	of the substance/mixture and of the company/undertaking
1.1. Product identifier	
Product name	Champion Bore Oil
	-
Internal identification	GHS22483
1.2. Relevant identified use	es of the substance or mixture and uses advised against
Identified uses	Mineral Oil
Uses advised against	Non specified unless otherwise stated within this MSDS
1.3. Details of the supplier	of the safety data sheet
Supplier	Barnes Mullins
	Unit 14 Mile
	Oak Industrial
	Est
	Oswestry
	SY10 8GA
	08.45 - 17.00 GMT
	Tel;01691652449
	Sales@bandm.co.uk
1.4. Emergency telephone	number
Emergency telephone	01691652449
SECTION 2: Hazards identification	
2.1. Classification of the su	bstance or
mixture Classification	
Physical hazards	Not Classified
Health hazards	Asp. Tox. 1 -

H304 Environmental hazards Not Classified

Classification (67/548/EEC or  $\ -$  1999/45/EC)

2.2. Label elements

Pictogram

Signal word

Danger

Hazard statements	H304 May be fatal if swallowed and enters airways.
Precautionary statements	P301+P310 IF SWALLOWED: Immediately call a POISON CENTER/doctor. P331 Do NOT induce vomiting. P405 Store locked up. P501a Dispose of contents/container to hazardous or special waste collection point.
Contains	White mineral Oil ( Petroleum)

### 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

## SECTION 3: Composition/information on ingredients

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

SECTION 4: First aid mea	SECTION 4: First aid measures	
4.1. Description of first ai	d measures	
General information	Get medical attention if any discomfort continues.	
Inhalation	If spray/mist has been inhaled, proceed as follows. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues.	
Ingestion	Do not induce vomiting. Product contains petroleum based material, which, if aspirated into the lungs may result in chemical pneumonia. Get medical attention immediately.	
Skin contact	Remove contaminated clothing immediately and wash skin with soap and water.	
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes. Get medical attention promptly if symptoms occur after washing.	
4.2. Most important symp	toms and effects, both acute and delayed	
General information	If aspiration into the lungs is suspected, eg when vomitting, admit to hospital	
immediately. Inhalation	Upper respiratory irritation.	
Ingestion	May cause discomfort if swallowed. The product contains mineral oil, which if aspirated into the lungs through vomitting after ingestion, may result in chemical pneumonia. May be fatal if swallowed and enters airways.	
Skin contact	Prolonged contact may cause redness, irritation and dry skin.	
Eye contact	Irritation of eyes and mucous membranes.	
4.3. Indication of any imm	nediate medical attention and special treatment needed	
Notes for the doctor	Treat symptomatically.	
SECTION 5: Firefighting	neasures	

**SECTION 5: Firefighting measures** 

## 5.1. Extinguishing media

Suitable extinguishing media Extinguish with foam, carbon dioxide, dry powder or water fog.

Unsuitable	Do not use water jet as an extinguisher, as this will spread the fire.
extinguishing media	

### 5.2. Special hazards arising from the substance or mixture

Specific hazards	Heat from fire could result in drums bursting
Hazardous combustion products	Protection against nuisance dust must be used when the airborne concentration exceeds 10 mg/m3. Oxides of carbon. Oxides of nitrogen. Fire may also create other unidentified organic gases some of which may be toxic.
5.3. Advice for firefighters	Control run-off water by containing and keeping it out of sewers and watercourses.
Protective actions during firefighting	
Special protective equipment for firefighters	Wear self-contained breathing apparatus.

SECTION 6: Accidental relea	ase measures
6.1. Personal precautions, p	rotective equipment and emergency procedures
Personal precautions	For personal protection, see Section 8. In case of spills, beware of slippery floors and surfaces.
6.2. Environmental precaution	ons
Environmental precautions	Contain spillage with sand or earth. Avoid the spillage or runoff entering drains, sewers or watercourses. The product is insoluble in water and will spread on the water surface.
6.3. Methods and material fo	or containment and cleaning up
Methods for cleaning up	Contain spillage with sand or earth. Collect spillage for reclamation or disposal in sealed containers via a licensed waste contractor. Avoid water contacting spilled material or leaking containers. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body. In case of spillage on water prevent the spread by use of suitable barrier equipment
6.4. Reference to other sect	ions
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. For waste disposal, see section 13.
SECTION 7: Handling and st	torage
7.1. Precautions for safe har	ndling
Usage precautions	Avoid spilling. Always remove oil with soap and water or skin cleaning agent, never use organic solvents. Do not use oil-contaminated clothing or shoes, and do not put rags moistened with oil into pockets.
Advice on general occupational hygiene	Do not eat, drink or smoke when using this product.

### 7.2. Conditions for safe storage, including any incompatibilities

Storage precautions Store in tightly-closed, original container in a dry, cool and well-ventilated

place. Storage class

7.3. Specific end use(s)

Miscellaneous hazardous material storage.

## **Specific end use(s)** The identified uses for this product are detailed in Section 1.2.

### SECTION 8: Exposure Controls/personal protection

## 8.1. Control parameters

### Occupational exposure limits White mineral Oil (

## Petroleum)

Long-term exposure limit (8-hour TWA): WEL  $5 \text{ mg/m}^3$  mist WEL = Workplace Exposure Limit

#### 8.2. Exposure controls

### **Protective equipment**

Appropriate engineering controls	Provide adequate general and local exhaust ventilation. Observe any occupational exposure limits for the product or ingredients.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Chemical splash goggles or face shield.
Hand protection	The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material.
Other skin and body protection	Use barrier creams to prevent skin contact.
Hygiene measures	Use engineering controls to reduce air contamination to permissible exposure level. Wash promptly with soap and water if skin becomes contaminated.
Respiratory protection	No specific recommendations. Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit.
Thermal hazards	Not anticipated under normal conditions of use. The product is combustible if heated excessively and an ignition source is applied.
Environmental exposure controls	Do not allow product to contaminate land.

## **SECTION 9: Physical and Chemical Properties**

9.1. Information on basic p	physical and chemical
properties Appearance	Liquid.
Colour	Colourless.
Odour	Odourless.
Odour threshold	Not determined.
рН	Not applicable.
Melting point	<-9° C
Initial boiling point and ra	nge 310-550°C@
Flash point	$>160^\circ~$ C COC (Cleveland open cup).
	_

Upper/lower flammability or explosive imits	Not known.
Other flammability	Product is not flammable but on excessive heating may become combustible.
Vapour pressure	<0.1 kPa @ 20° C
Vapour density	Not determined.
Relative density	0.83-0.86 @ 15° C
Solubility(ies)	Insoluble in water. Soluble in the following materials: Organic
solvents. Partition coefficien	<b>it</b> Not determined.
Auto-ignition temperature	>160° C
Decomposition Temperature	e Not
determined. Viscosity	15 cSt @ 40° C
Explosive properties	Not considered to be explosive.
Explosive under the influence of a flame	Not considered to be explosive.
Oxidising properties	The mixture itself has not been tested but none of the ingredient substances meet the criteria for classification as oxidising.
9.2. Other information	
Volatile organic compound	The product is a complex mixture, the majority of which would not be classed as a VOC. However it cannot be discounted that trace or low levels of VOC's may be present.
SECTION 10: Stability and re	eactivity
10.1. Reactivity	
Reactivity	There are no known reactivity hazards associated with this product.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended.
10.3. Possibility of hazardou	s reactions
Possibility of hazardous reactions	Unlikely to occur under normal conditions of use. Unlikely to occur.
10.4. Conditions to avoid Conditions to avoid	Avoid heat, flames and other sources of ignition.
10.5. Incompatible materials	;
Materials to avoid	Strong oxidising agents.
	ion products
10.6. Hazardous decomposit	

# 11.1. Information on toxicological effects

Acute toxicity - oral Notes (oral LD<sub>50</sub>)

Not expected to be highly toxic based on information of ingredients.

Acute toxicity - dermal	
Notes (dermal LD <sub>50</sub> )	Not expected to be highly toxic based on information of ingredients.
Acute toxicity - inhalation Notes (inhalation $LC_{50}$ )	Not determined. The product is unlikely to present any significant inhalation hazard at ambient temperatures and under normal conditions of use.
Serious eye damage/irritatio	n
Serious eye damage/irritatio	on May cause mild, short lasting discomfort to eyes.
Respiratory sensitisation Respiratory sensitisation	No evidence to suggest the product will be a respiratory sensitiser. Repeated exposure to oil mists may cause respiratory damage.
Skin sensitisation	
Skin sensitisation	Not expected to be a skin sensitizer based on information on components.
	ity No data available to suggest the product will cause reproductive toxicity.
Aspiration hazard Aspiration hazard	Kinematic viscosity $\leq$ 20.5 cSt @ 40 C. Poses an aspiration hazard.
General information	This product has low toxicity. Only large quantities are likely to have adverse effects on human health.
Inhalation	High concentrations of vapours may irritate respiratory system and lead to headache, fatigue, nausea and vomiting.
Ingestion	Swallowing significant quantities may cause discomfort, nausea, diarrhoea and irritation of the digestive tract. Aspiaration into the lungs (e.g. through vomiting) after ingestion can be hazardous with possible resultant chemically induced pneumonia. May be fatal if swallowed and enters airways.
Skin contact	Skin irritation should not occur when used as recommended. Repeated exposure may cause skin dryness or cracking.
Eye contact	May cause temporary eye irritation.
Acute and chronic health hazards	Prolonged or repeated contact with used oil may cause serious skin diseases, such as dermatitis and skin cancer.
SECTION 12: Ecological Info	rmation

Ecotoxicity	The product is not expected to be hazardous to the environment.
12.1. Toxicity	
12.2. Persistence and degra	dability
Persistence and degradabil	ity The product is not classed as being readily biodegradeable by OECD test methods but is considered inherently biodegradable.
Stability (hydrolysis)	The product is based on highly refined mineral oils that are considered stable to hydrolysis.
Biodegradation	The product is not considered readily biodegradeable, albeit the major constituents are expected to ultimately biodegrade.
Biological oxygen demand	Not
determined. Chemical oxyge	n demand Not
determined.	

12.3. Bioaccumulative potent	tial
Bioaccumulative potential	Bioaccumulation is unlikely to be significant because of the low water-solubility of this
product. Partition coefficient	Not determined.
12.4. Mobility in soil	
Mobility	The product is non-volatile. The product is insoluble in water and will spread on the water surface.
Henry's law constant	Not determined.
12.5. Results of PBT and vPv	Bassessment
Results of PBT and vPvB assessment	This product does not contain any substances classified as PBT or vPvB.
12.6. Other adverse effects	
Other adverse effects	None known.
SECTION 13: Disposal consi	derations
13.1. Waste treatment metho	ods
General information	Waste should be treated as controlled waste. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.
Disposal methods	Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.
Waste class	European Waste Catalogue (EWC) number = 13 08 99* (waste not otherwise specified)
SECTION 14: Transport infor	mation
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).
<b>14.1. UN number</b> Not applicable.	
14.2. UN proper shipping nar	ne
Not applicable.	
<b>14.3. Transport hazard class</b> No transport warning sign req	_
<b>14.4. Packing group</b> Not applicable.	
14.5. Environmental hazards	
Environmentally hazardous s	ubstance/marine pollutant
14.6. Special precautions for	user
Not applicable.	
-	ding to Annex II of MARPOL73/78 and the IBC Code
Transport in bulk	
according to Annex II of	Not applicable.

SECTION 15: Regulatory information
------------------------------------

15.1. Safety, health and environmental regulations/legislation specific for the substance	
or mixture National regulations Health and Safety at Work etc. Act 1974 (as amended).	
	The Pollution Prevention and Control Act 1999. Special Waste regulations 1996. Control of Pollution (Oil Storage) (England) Regulations 2001 The Chemicals (Hazard Information and Packaging for Supply) Regulations 2009 (SI 2009 No. 716).
EU legislation	Dangerous Preparations Directive 1999/45/EC. Dangerous Substances Directive 67/548/EEC. Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended). Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended).
Guidance	Workplace Exposure Limits EH40. Safety Data Sheets for Substances and Preparations.

## 15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

Hazard statements in full H304 May be fatal if swallowed and enters airways.

This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty, guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.
